Notes: Y = All sorts of Income Tax, M = Import Duty, Sup = Supplementary Duty & Excise Duty, EO=Electricity and Other Taxes, Non-NBR=Non-NBR Taxes, and Ntax Rev=Non-tax Revenue.

the tax structure of Bangladesh can easily be seen from it. These are:

- Too much dependence on indirect taxes (only 12.1% from income tax, about 12.6% from all direct taxes including income tax)
- Biased towards external sector (about 40%) and susceptible to external shocks.

Data generated under the Budgeting Information System still underreports development expenditure and it seems there is some time lag between actual expenditure and inputting the same in the System. This seems to be true both for Revenue expenditure and Development expenditure.

The major problematic areas are:

- Regarding expenditures up to August FY09, 14 (fourteen) ministries/divisions show a utilization of revenue resources more than 12%.
- Overall development expenditure remains unreported. There is also a probability that development expenditure remains under-utilized up to the second half of the year resulting misutilization towards the end of the FY. This needs to be addressed.

## f. Budget Financing

Table e.1 in the previous page presents the budget deficit position. The table presented below indicates sources of financing the deficit and their shares. Following Values of major policy variables emerge from the above-mentioned two tables:
