FIGURE 8 SOURCES OF FINANCING DEFICIT

In the first eight months of the FY13, financing is positive as the overall balance is negative. On annual and monthly basis, there is a slight difference between NSD source and CGA source for Non-Bank borrowing.

Data generated under the Budgeting Information System still under reports Development expenditure and it seems, there is some time lag between actual expenditure and inputting the same in the system. This seems to be partially true also for Revenue expenditure.
